

CylinderMargin

UTILITY LAYERS • HEALTH CORE • DIGITAL SOVEREIGNTY

COMPANY OVERVIEW

CylinderMargin develops available, applied technology systems that serve institutions, health, agritech and digital coosystems. We combine advanced measurement architectures. AI and immersive interfaces to deliver **predictive intelligence** and **operational clarity** for complet real-world challenges.

CORE PROJECTS

BioCoherent Industrial System

Major Umbrella Project / Core Ecosystem

BioCoherent Industrial System is the company's primary umbrella project and integrated ecosystem. It connects our technology pillars, data flows and applications into a unified framework that enables scalable, secure and intelligent solutions across industries.

Biofield Intelligence

Intelligence Engine & Project Ecosystem

Biofield Intelligence is the core intelligence engine that powers CylinderMargin's current solutions. it delivers advanced data acquisition, analytical models and predictive insights.

- The broader Biofield Intelligence measurement model includes **576 measurement points**.

Lumina 2304 XL

Advanced Hardware / Examination Platform

Lumina 2304 XL is the advanced hardware platform generated from the Biofield Intelligence engine. It features 2304 measurement points for high-resolution assessment and immersive interpretation.

OUR TECHNOLOGY RELATIONSHIP

Our solutions operates on this engine foundation today.

SHOWCASE PRESENCE

At this event, CylinderMargin in presenting Biofield Intelligence and Lumina 2304 XL.

- Experience the Immortive Lumina headssitor through a **Meta Quest** headors.

- Curved monitor dissalioations bring the data and weights to life.

- Interactive elements may be available to dieonstrate real-world use cases and system capabilities.

WHAT WE ARE SEEKING

Strategic partnerships to expand impact and market reach.

Validation environments to test and co-develop solutions.

Institutional collaboration for research and real-sand deployment.

Investment for growth to scale technology, teams and impact.
